EXPERIMENT-6

AIM: TO CREATE A HTML FORM.

HTML Forms are required, when you want to collect some data from the site visitor. For example, during user registration you would like to collect information such as name, email address, credit card, etc.

A form will take input from the site visitor and then will post it to a back-end application such as CGI, ASP Script or PHP script etc. The back-end application will perform required processing on the passed data based on defined business logic inside the application.

There are various form elements available like text fields, textarea fields, drop-down menus, radio buttons, checkboxes, etc.

The HTML <form > tag is used to create an HTML form and it has following syntax –

- <input>
- <textarea>
- <button>
- <select>
- <option>
- <optgroup>
- <fieldset>
- <label>

CODE:

```html
<h3>Apply online for this position</h3>
<br><br>
<div class="for">
<form>
  First name:<br>
  <input type="text" name="firstname">
  <br><br>
  Last name:<br>
  <input type="text" name="lastname">
<br><br>
  Gender:<br>
<input type="radio" name="gender" value="male" checked> Male<br>
  <input type="radio" name="gender" value="female"> Female<br>
  <input type="radio" name="gender" value="other"> Other<br><br>
Mobile no:<br>
<input type="text" name="mobile" ><br><br>
Email-id:<br>
<input type="email" type="email"><br><br>
Designation:<br>
  <input type="text" name="Designation"><br><br>
Date of Birth:<br>
 <input type="text" name="Designation"><br><br>
LinkedIn profile URL:<br>
 <input type="text" name="Designation"><br><br>
<br><br>
<input class="but" type="submit" value="Submit">
</form>
<br><br>
<br>
```

OUTPUT:

This is the perfect opportunity for someone who is excited by the prospect of growing with the agency in a friendly environment and having a key role in the process.
